THE ULTIMATE MARINE COVER FABRIC

TOP GUN™ is an acrylic-coated 100% woven polyester fabric (600 denier) utilizing a proprietary process to coat both the top and bottom, thus allowing the fabric to be completely reversible. It is characterized by excellent strength, durability, tear and abrasion resistance, dimensional stability, UV and mildew resistance.

TOP GUN™ is the ultimate coated fabric that provides unrivaled durability, tear and abrasion resistance.

TOP GUN™ can be used for many outdoor applications such as marine tops, trailer covers, gazebos, canopies, tarps, playground equipment covers, BBQ grill covers, patio furniture, and many other useful applications.

TOP GUN™ is 62" wide, 11.5 ounces per square yard, and is dimensionally stable. The specially formulated coating will not crack or peel in the widest range of heat and cold, and is available in a wide variety of popular shades - from bold and bright to soft and neutral.

Periodic cleaning with a solution of 4 oz. of bleach and 2 oz. of soap, NOT DETERGENTS, in one gallon of water is recommended to minimize accumulations of dirt and bird droppings, which can support surface mildew growth and cause fabric staining.

Treatment with AQUA-TITE® water repellent after cleaning may be required to restore the original level of water resistance.

Do Not Expose To Direct Flame or Extreme Heat.

Top Gun^{FR} is the flame retardant version of Top Gun.

5 Year Warranty
